Research Interests

Large language models under constrained settings, with a focus on model compression and knowledge distillation, supervised fine-tuning and reinforcement learning, retrieval-augmented generation (RAG), and LLM-based AI agents. Research interests include calibrated uncertainty in teacher–student distillation and domain-specific LLM applications for medical AI.

Education

M.S. | *Department of Artificial Intelligence Convergence* — 2024.TODO–2027.TODO
- Ewha Womans University — Seoul, South Korea
- LKI Lab, Advisor: Prof. Hyunsoo Cho

B.S. | *Division of Mechanical and Biomedical Engineering* — 2021.TODO–2024.TODO
- Ewha Womans University — Seoul, South Korea

Publications

International Conferences

- **Trust the Uncertain Teacher: Distilling Dark Knowledge via Calibrated Uncertainty**
  Jeonghyun Kim, Richeng Xuan, Hyung Wook Noh, SooKyung Kim, Hyunsoo Cho
  Findings of the Association for Computational Linguistics: EMNLP, 2026. Accepted.
- **LYRICS: Line-by-Line Lyric Generation with Joint Control of Syllables, Context, and Rhyme**
  Seoyeon Ko*, Hyunseo Kim*, Seoyeong Hwang*, Jihyun Yu, **Jeonghyun Kim**, Hyunsoo Cho, Junhyug Noh
  International Conference on Information and Communication Technology Convergence (ICTC), 2025.

Preprints & Under Review

- **Forward Clinical Features Enable Treatment-Aware Prediction and What-If Scenario Analysis for Acute Kidney Injury**
  Hyung Wook Noh*, Chan Hur*, **Jeonghyun Kim***, Yoonseon Song, Hyunsoo Cho, Yunseo Ku, Dae Eun Choi
  Under review, 2026.

Research Projects

Multimodal AI for Early Diagnosis of Hepato-Pancreato-Biliary Premalignant Lesions — TODO
- Global Basic Research Laboratory project (간담췌 전암 진단을 위한 멀티모달 AI 기초연구실)
  Developed AI-agent-based automatic training data generation and CT findings prediction models.

XAI-LLM-based Multimodal 3D Vital Node for Chronic Kidney Disease — TODO
- Korea ARPA-H project for CKD prevention, management, and early detection of acute deterioration
  Fine-tuned reasoning LLMs for clinical decision support; preprocessed and generated training data.

Skills

Languages & Tools: Python, Linux, Git
Frameworks: PyTorch, Hugging Face, LangChain, LangGraph
Languages: Korean (native), English (TODO)
